

**REACH Regulation 1907/2006/EC,
RoHS Directive 2011/65/EC and Directive 2015/863 App II/EC**
(At the latest version.)

Dear Ladies and Gentlemen!

The materials and products supplied by LEHMANN comply with the requirements of REACH (Regulation (EC) 1907/2006) including the latest ECHA List Update, RoHS (Directive 2011/65/EC).

We fully comply with our obligation to provide information in the supply chain in accordance with Art. 33 REACH.

For the products which we supply to you, it is relevant to know that they do not contain any forbidden CMR-substances. We have introduced a routine for checking that the material specifications are up to date. Through close contact and communication with our suppliers, we ensure that we receive information at an early stage as to whether hazardous substances are contained. Although the legal requirements in their current version (e.g. RoHS, REACH candidate list) are at the forefront of our enquiries, we also enquire about industry-specific requirements that go beyond the legal requirements in order to be able to initiate substitution requirements as early as possible.

Regarding our own production we can say that our products are manufactured in controlled processes. Our chemical management system ensures that our products were not containing hazardous substances above the legal level.

Our Hazardous Substances Officer will be happy to answer any further questions you may have on the subject of substance safety.
